PROFILE

Software Engineering student at the University of Zimbabwe with a growing interest in full-stack web development, backend systems, and database-driven applications. Has hands-on project experience using React, JavaScript, Node.js, MongoDB, and Java, and is continuously improving skills in REST APIs, authentication, databases, and practical software development.

EDUCATION

University of Zimbabwe	BSc Honours in Software Engineering — Current
Mandedza High School	Advanced Level — 3 A-Level passes including Mathematics, Physics, and Computer Science
Mandedza High School	Ordinary Level — 12 O-Level passes

TECHNICAL SKILLS

Frontend: React; JavaScript; HTML5; CSS3; Responsive Design
Backend: Node.js; Express.js; REST APIs; Authentication; Java
Database: MongoDB; CRUD Operations; Data Modeling
Tools / AI: Git; GitHub; VS Code; Hugging Face; Debugging

PROJECTS

Smart Campus Service System — *React; Node.js; MongoDB; Hugging Face AI*
Full-stack platform for reporting and managing campus facility issues, with email OTP verification, admin complaint management, and semantic duplicate detection for grouping similar complaints.

Telecom Support Ticket Dashboard — *React; Node.js; MongoDB*
Support ticket system for submitting, tracking, and organizing telecom-related issues, with a focus on clean UI, clear status feedback, and structured ticket management.

ADDITIONAL STRENGTHS

Problem Solving; Communication; Teamwork; Fast Learner; Attention to Detail; Time Management

ADDITIONAL INFORMATION

Additional Skills: Clean Class 4 Driver's Licence

Languages: English; Shona | **Hobbies:** Basketball, technology learning
